For a Hammer... or a range of Hammers

KANGO is the name!

Whatever the nature of the work—heavy, medium, light or overhead—the ideal Electric Hammer is in the Kango range. Each of the three Kango models is supreme in its class, designed and built for hard, continuous service by specialists with over 25 years experience in the manufacture of Electric Hammers.

Power without bulk! This is the Hammer for tough jobs such as cutting away, drilling up to 3" diameter holes in concrete, brick and similar materials. At its weight (just under 22 lbs.) the Kango model 'E' is the most powerful Electric Hammer in the world!

Designed for a wide range of applications in the medium field of work, the Kango model 'F' is the ideal general purpose Electric Hammer. It is specially suitable for bush hammering, vibrating, tamping, hacking and drilling holes from $\frac{3}{8}$ " to $1\frac{1}{2}$ " diameter. It weighs 17½ lbs.

The Kango model 'G' Hammer weighs only 14 lbs. and is the perfect Hammer for all classes of overhead work, where a heavier model might be too cumbersome. Amongst its other applications it is particularly useful for chase cutting, brick raking and many types of scaling.

The Kango Portable Generating Set

Supplied only by
KANGO ELECTRIC HAMMERS LTD.
or their distributors

The Kango Portable Generating set is designed specially by Auto Diesels Ltd., Uxbridge, Middlesex, for use with Kango Hammers on outside sites and locations where mains electricity is not available. It is of rugged construction and is fully protected against weather. It can be carried easily by two men or can be supplied with pneumatic, or solid tyred wheels, or mobile tracks. It is economical in price and provides sufficient power to operate two Kango Hammers at one time.
